

Fatigue, alcohol and performance impairment

NATURE | VOL 388 | 17 JULY 1997

Dawson A, & Reid K. p.235

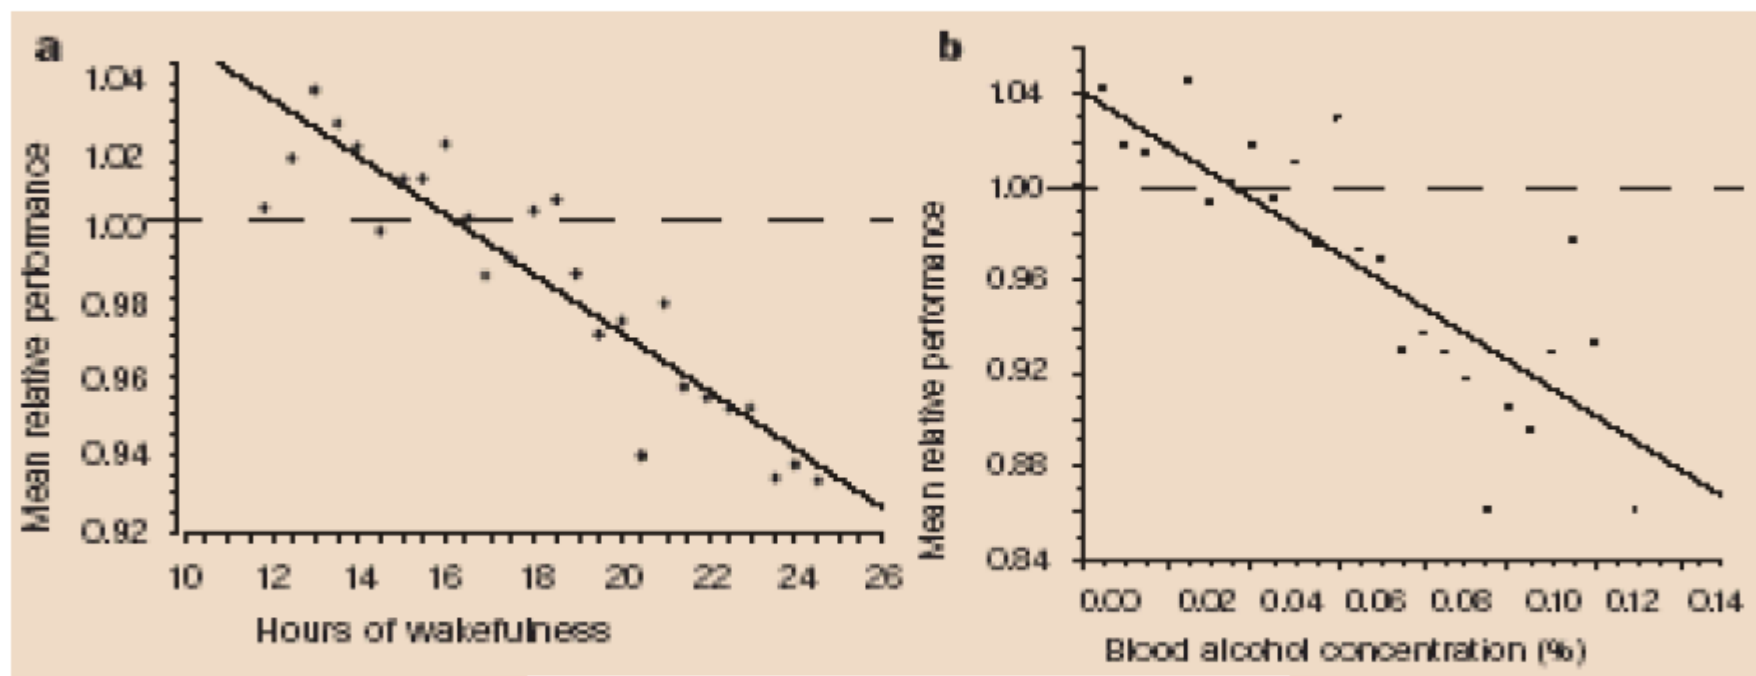

Figure 1 Scatter plot and linear regression of mean relative performance levels against: **a**, time, between the tenth and twenty-sixth hour of sustained wakefulness ($F_{1,24}=132.9$, $P<0.05$, $R^2=0.92$); and **b**, blood alcohol concentrations up to 0.13%, ($F_{1,24}=54.4$, $P<0.05$, $R^2=0.69$).
